

Paul Vos

January 27, 1956 - April 19, 2023

Paulus Alexander Vos, 67, of Seneca, SC, passed away on Wednesday, April 19, 2023, after a courageous nine-year battle with prostate cancer.

Paulus (Paul) was born 27 January 1956, in Valkenswaard, The Netherlands, to the late Joseph Vos and Maria Lubbers and grew up in Waalre, The Netherlands. He moved to the United States to play basketball (he was 7 ft. tall!) and study mechanical engineering at Brigham Young University. He met his wife of 40 years, Mary, at the San Francisco Airport, and they later wed in the Netherlands. Paul worked in South Africa and across the United States as a mechanical and quality engineer. He was a lover of his 1972 Citroen DS "Snookie" and drop (Dutch black licorice). He repaired his first engine at the age of six and you could find him most weekends repairing a car. Paul is survived by his wife, Mary Shannon-Vos, his children Seychelle (Lucas Farnung), Sebastian (Michiel Veling), and Saskia (Alexander Taujours), and his beloved cat, Sam. In lieu of flowers, the family asks that donations be made to Zero Prostate Cancer and the Hope House in Nashville, Tennessee.

Tribute Wall

“ I’m just finding out about Paul’s passing. Paul was an absolutely remarkable human and unrivaled quality professional. I worked with Paul at Meggitt and most people were intimidated by him and his knowledge. I found him as a breath of fresh air. Paul was the one person that truly understood quality and the methodologies to turn manufacturing into operational excellence. Over the years I looked to him as a mentor. He is, by far, the greatest quality mind I’ve come across. He will be missed dearly.

Trudy Kendrick - March 08, 2025 at 08:30 PM

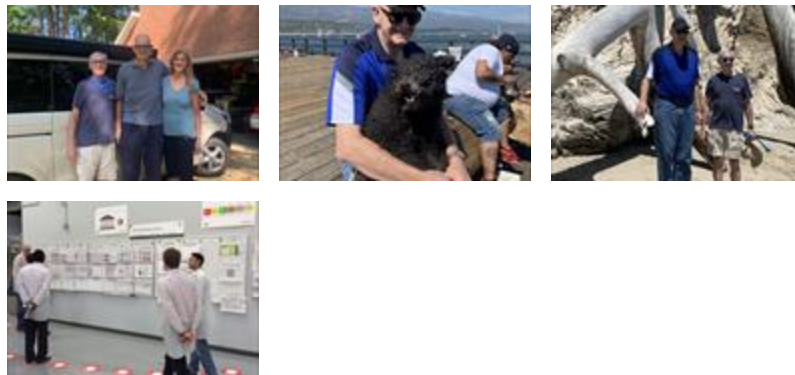

“ Thinking of Paul on this anniversary of his passing.

GG

“ Paul was my work colleague and good friend. He was the Eastern Regional Quality Manager for Meggitt and I was the Western Regional Quality Manager. Paul showed me the ropes of the job which was done with enthusiasm and thoroughness. He ran hundreds of training classes and performed quality audits. He was known for finding FOD as at 7 feet tall he had a bird's eye view of the manufacturing areas. Paul was a problem solver and outspoken about controlling waste. We had great times travelling to multiple Meggitt locations. I'll miss our conversations and his advice. Greg Gallant
