“ I had the priveledge of working at Better skills for 10 years and a part of it was taking the clients to and from the center. So fortunate to have Reba on my route. We became best friends. Virile and Reba and I spent many special times together through the years and they became part of my family. Will really miss her and her special phone calls and time spent visiting. She was and will always have a special place in my heart. As Reba will always have.
